AND UPDATES!**

SPECIAL EDITION

SHOOT LOCATION UPDATE

Hello Sponsors!

Thank you once again for supporting this Pilot Science Show for Kids Initiative. You will be receiving a Newsletter Update each month to keep you abreast of how everything is progressing for the Pilot Show. If you would provide your email address, I can send the newsletter directly to your email instead of placing notice on Facebook to ask you to go to the website. If you would like to do this, please email me your email address at: drd@neighborhood-science.com

We (Nick Mellis-Co producer/cameraman, Jim Monteforte, Editor/Co-Producer and I) are excited to begin shooting January 22 and January 29 at a Catholic School in Pennsauken, NJ. Jim worked very hard in finding a location that would allow us to transform the room so it looks as "sciency" as possible and that is also within our budget. You can see the photos to your right. Classroom 6 is an option since there are some science pictures and cutouts on the walls and is a bit more colorful. Although we will be using green screens, we did not want the entire show to be a green screen so we feel Class 6 has good options.

FACEBOOK FUNDRAISING FIASCO

Update

Although I will never again use FACEBOOK for fundraising, I am still hopeful that all works out with the monies raised to be deposited on January 15, 2022. It takes 6 weeks for the funds to be deposited which I just don't understand. Anyway, there was an issue where I was told that I closed the fundraiser and that all monies were returned to the donors. Then when I informed them that I did no such thing to another person, I was told that they see the funds but it would not show up in the account until the 15th of January. I have to wait to see what is the status on the 15th. I will keep you posted in the February Newsletter as to if the monies were released to Mad About Science, Inc.

Thank
you!

Once again I would like to THANK each and every one of you for supporting this pilot project. I am committed to my organization's mission of:

CHANGING THE FACE OF STEM by providing ALL students, especially those from underrepresented populations, with an opportunity to see science as fun, engaging, and obtainable, but also an opportunity for them to see science presented to them by a person who looks like them as well!

Thank you for being an integral part of this journey!

Forever grateful,
Darlyne aka Dr. d
